## TECHNICAL GROUP/DAS/IMSS/OL WEEKLY REPORT FOR PERIOD ENDING 28 SEPTEMBER 1984

## 1. Major Activities During the Past Week:

Support to OL:

AF.	Contract Information System (CONIF).  attended an LSD ERB. The main
M	order of business was to close out several DRs and rank the priorities for modifications to CONIF, ICS, and GAS for the next two quarters.
	On 25 September 1984, attended an LSD TEM. The
K	schedule for end of fiscal year processing was agreed upon. Another TEM will be held on 02 October 1984 to review progress on this task and modify the schedule if necessary.

- 2. General Items:
- 3. Problems:

Contract Information System (CONIF). This past week, CONIF continued to experience record deadlocks. On Wednesday, a new technique was employed by those menus that appear to be part of the record deadlock problem. The procedure insures that the menus run one at a time. The occurrence of record deadlocks has decreased dramatically. In the meantime, OL/CONIF is being monitored regularly to reduce the opportunity for problems.
